

Eco Gravity PP

A unique purification system, which can be used in any coherence, in any part of the world. No need for electricity or water pressure!

This system is perfect for staff camp, refugee camp or emergency container. Eco Gravity PP is a purification unit run solely by gravity. By simply filling water into the top compartment, it is then filtered through ceramic candles and filling up the lower compartment with clean, uncontaminated drinking water. The lower compartment has a small tap, open it, and you can enjoy clean drinking water. The system can deliver 20 liters of drinking water per 24 hours!

This system is extremely easy to set up and highly user friendly. Weighing only 1.5kg, it is easy to move. Simple maintenance. The unit is available in plastic or stainless steel.

The system removes/reduces:

- ✓ Bad taste, bad smell and colouring
- ✓ Particles/Humus
- ✓ 95 % chlorine
- ✓ 98 % turbidity
- ✓ Some heavy metals like lead and iron
- ✓ 99,99 % pathological bacteria (E-Coli, salmonella, legionella, cholera, shigella, typhoid)
- ✓ 99,99 % parasites (cryptosporidium, giardia)

Specifications

Capacity

Up to 20 litres of uncontaminated, clean water per 24 hours with two ceramic candles. It is advisable to change the candles after 6-12 months of daily use. The unit does not work below freezing point.

Measurements
