

Dental Rack Unit

Rack unit developed to deliver optimal water quality.

The unit is delivered preassembled with pipes, fittings and taps. The only plumbing needed is to connect the unit to the inlet and outlet. Supplied flexi hoses with 3/4" female pipe threads makes the job easy for the plumber. The unit has a convenient drip tray at the bottom to avoid spills when changing filters. The unit is delivered with 2 pre-filters (5 and 1 micron filters), followed by the unique Eco Solution water filter technology to ensure safe and pure water at the clinic.

Eco Dental rack small	for 1-2 units
Eco Dental rack medium	for 3-4 units
Eco Dental rack large	for 5-10 units

All components are manufactured by renowned international manufacturers. Purification specifications are well documented. The purification unit contributes to the improvement of both quality and patient safety in regards to parasitic/bacterial outbreaks. Operated solely by water pressure.

The purifications system removes:

≈ Particles, humus and other sediments	≈ 99,999 % of parasites (cryptosporidium, giardia)
≈ Bad smell, bothersome color og bad taste	≈ 97 % chlorine
≈ 99,99 % of pathogenic bacteria (E.Coli, salmonella, legionella, cholera, shigella, typhoid)	≈ 99,7 % turbidity

The unit also reduces the levels of some dangerous chemicals and heavy metals.

Capacity:

1.500 - 4.500 liters per hour (with 4 bar water pressure).
 Filter change recommended every 12 months (daily use).
 The unit is to be installed on the water intake.

Measurements (HxWxD cm):

Small; 110x60*x25
 Medium; 150x60*x25
 Large; 190x60*x25

*Mounting plate width 39 cm

Praktisk avtagbart dryppeskål

Tilgjengelig i forskjellige konfigurasjoner!
